

Dot Group DataSprint

COST EFFECTIVE
ACCELERATED FILE TRANSFER

DataSprint is Dot Group's game-changing file transfer solution powered by IBM Aspera technology.

Providing guaranteed speed, security, and affordability, DataSprint delivers files of any size to any location with transfer speeds of up to 20Gbps. With flexible solutions to match your specific workflow needs and budget requirements.

In today's content-rich media environment, the ability to move large files quickly and securely can make or break your workflow. DataSprint addresses this challenge by removing traditional barriers to enterprise-grade file transfer technology.

Why DataSprint?

Efficiency and Speed:

DataSprint accelerates file transfers, leveraging your existing infrastructure, optimizing your workflows, and reducing transfer times. Transfer large files up to 20Gbps regardless of distance or network conditions.

Military-Grade Security:

Rest easy knowing that your data is transferred securely. DataSprint employs robust encryption protocols to protect your sensitive information during transit and at rest, ensuring your valuable content remains protected.

Scalability:

Grow your data operations without worry. DataSprint scales effortlessly to meet the increasing demands of business, from small productions to major broadcast operations.

Flexible Pricing Models:

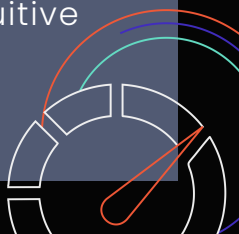

With both Fixed Price and On Demand options, DataSprint is designed to meet the specific needs of your business. Choose predictable costs or pay-as-you-go flexibility to match your workflow requirements.

Seamless Integration:

Extensive APIs allow DataSprint to integrate smoothly with your existing media workflow systems, enhancing efficiency without disrupting established processes.

Global Collaboration:

Enable teams across different locations to work together effortlessly with secure file sharing, shared workspaces, and intuitive collaboration tools.

Choose Your DataSprint Solution

Fixed Price

Our original pricing model provides complete cost predictability:

- Low fixed quarterly cost
- Unlimited data transfers
- Unlimited users
- Unlimited workspaces
- Flexible payment options: quarterly, annually, multi-year
- No hidden costs

On Demand

Our **new** flexible pricing option designed for variable workloads:

- Low entry cost
- Pay only for what you transfer
- No long-term commitment
- Maximum bandwidth flexibility
- Scale up or down based on project demands
- **Ideal for facilities with fluctuating transfer requirements**

Deployment Options

DataSprint Cloud:

- Transfer software
- Virtual Server
- S3-compatible object storage
- Egress from cloud provider
- Technical support
- Service management
- Zero Cloud egress costs

DataSprint Private:

- Transfer software
- Technical support
- Service management
- Deploy on premise (private) or in any cloud (cloud agnostic)
- Bring your own server (physical or VM) and storage

Transparency is at the core of DataSprint. Enjoy the peace of mind that comes with a solution that boasts no hidden costs and offers dedicated 24/7 technical support.

Capabilities
